

Authentic Soil Regeneration

Soil Sampling and Submission

1. Use a rust free probe (an apple corer does fine).
2. Take from the top six inches of soil only. (In root crops go down 12 inches.)
3. Do not take sample from high or low spots of field – take from an average elevation.
4. Place sample in a pint size Ziploc freezer bag – filling bag half full.
5. Include your field ID, date and your name on each soil sample.
6. Include name, address, phone number, instructions and services requested. Make checks payable to ***Authentic Soil Regeneration***.

Name _____

Address _____

Address _____

Phone _____ Email _____

Plot ID _____ Crop _____

Services requested per sample:

Microbe assay \$40.00 _____ (Video format CD)

Reams/Lamotte \$45.00 _____
